## RAEON WINS MIRA TECH PARK INNOVATION AWARD!

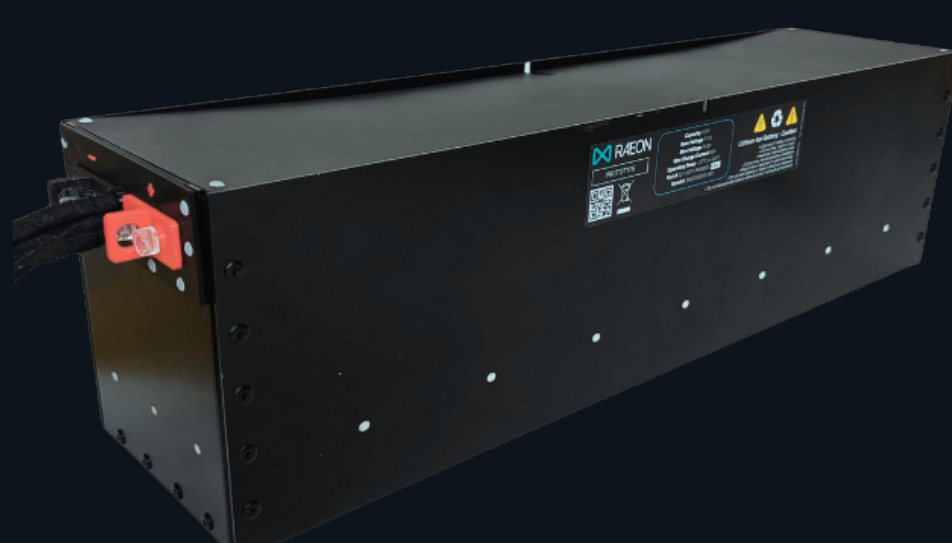

Raeon has been named a winner of the 2025 MIRA Tech Park Innovation Competition, following our Clean Futures Accelerator journey.

We'll receive 12 months of expert mentoring and partner access, accelerating our mission to deliver next gen custom battery systems faster than ever.

## CASE STUDY SPOTLIGHT: RAEON x ENOUGH ENERGY

This month, we're spotlighting our collaboration with UK clean-tech start-up Enough Energy. Raeon delivered 15 custom battery modules built with LFP cells, enabling the rapid development of their mobile EV charging prototype.

*representation, not actual system*

Using our FloLock™ technology, each pack was engineered to meet strict spatial, thermal and performance constraints, while keeping development time and cost to a minimum.

**WE ARE OFFICIALLY A 'Made in Britain' MEMBER!**

We design and build custom lithium battery systems right here in the UK. That means local manufacturing, local expertise, and real impact across the industries we serve.

Joining Made in Britain isn't just a milestone for us. It's a reflection of our values, and a commitment to keep building energy solutions that start at home and reach far beyond.

**OUR VERY OWN MARISA NAMED AMONG UK's  
TOP 100 MANUFACTURERS!**

We're proud to share that our very own Marisa Kurimbokus, Head of Engineering at Raeon, has been named one of The Manufacturer Top 100 for 2025 at Smart Manufacturing Week.

Marisa also received a rare honour as an Exemplar in the “Young Pioneer” category a title awarded to just 20 individuals driving innovation, leadership and excellence in UK manufacturing.

## RAEON EVENTS HIGHLIGHTS

Here's where we've been this summer, talking all things custom batteries.
